Module Leader: Jamie Finlay

Contents

Overview

www.ovalskiclub.com is a website provided for Oval Ski Club based in the North West. This website provides any avid skiers in the North West and the clubs customer's easy access to any information they may require.

NOTE: This specification is not complete. The graphics and layouts of the web pages shown throughout this specification are merely in place to show the functionality of the website.

This build of the website will not have any database support not allowing users to sign in or register. Other components not supported in this build of the website can be found under None Supported Features.

Scenario

Scenario 1

Residents of Merseyside may be interested in going on a skiing holiday. Before they go on a skiing holiday they decide they want to learn to ski. They may use a search engine to find skiing lessons in Merseyside and come across Oval Ski Clubs website. This provides the users the chance to find out where the ski club is based and find out the pricing, dates and times of skiing lessons. The users can then choose to contact the club via e-mail, phone or using the websites personal contact form for more information regarding skiing lessons.

The User could also want more information on when Oval Ski Club has a holiday and can view pictures of past and up and coming holidays.

Scenario 2

Laura has been a regular skier at Oval Ski Club for a few months and wants to no more about how the club is run. By using the clubs website the information on how to volunteer, the committee and the instructors can be found. Laura then decides she wants to enter the winter races that are coming up. Using the website Laura reads up on the winter's races and fills in the online registration form to take part in the races.

A week later Laura decides to visit the website again to see when the open skiing session is and when the advanced skiing lessons are in order to improve her skiing ready for the up and coming race. By looking at the diary the necessary dates can be found for Laura to attend her next lessons.
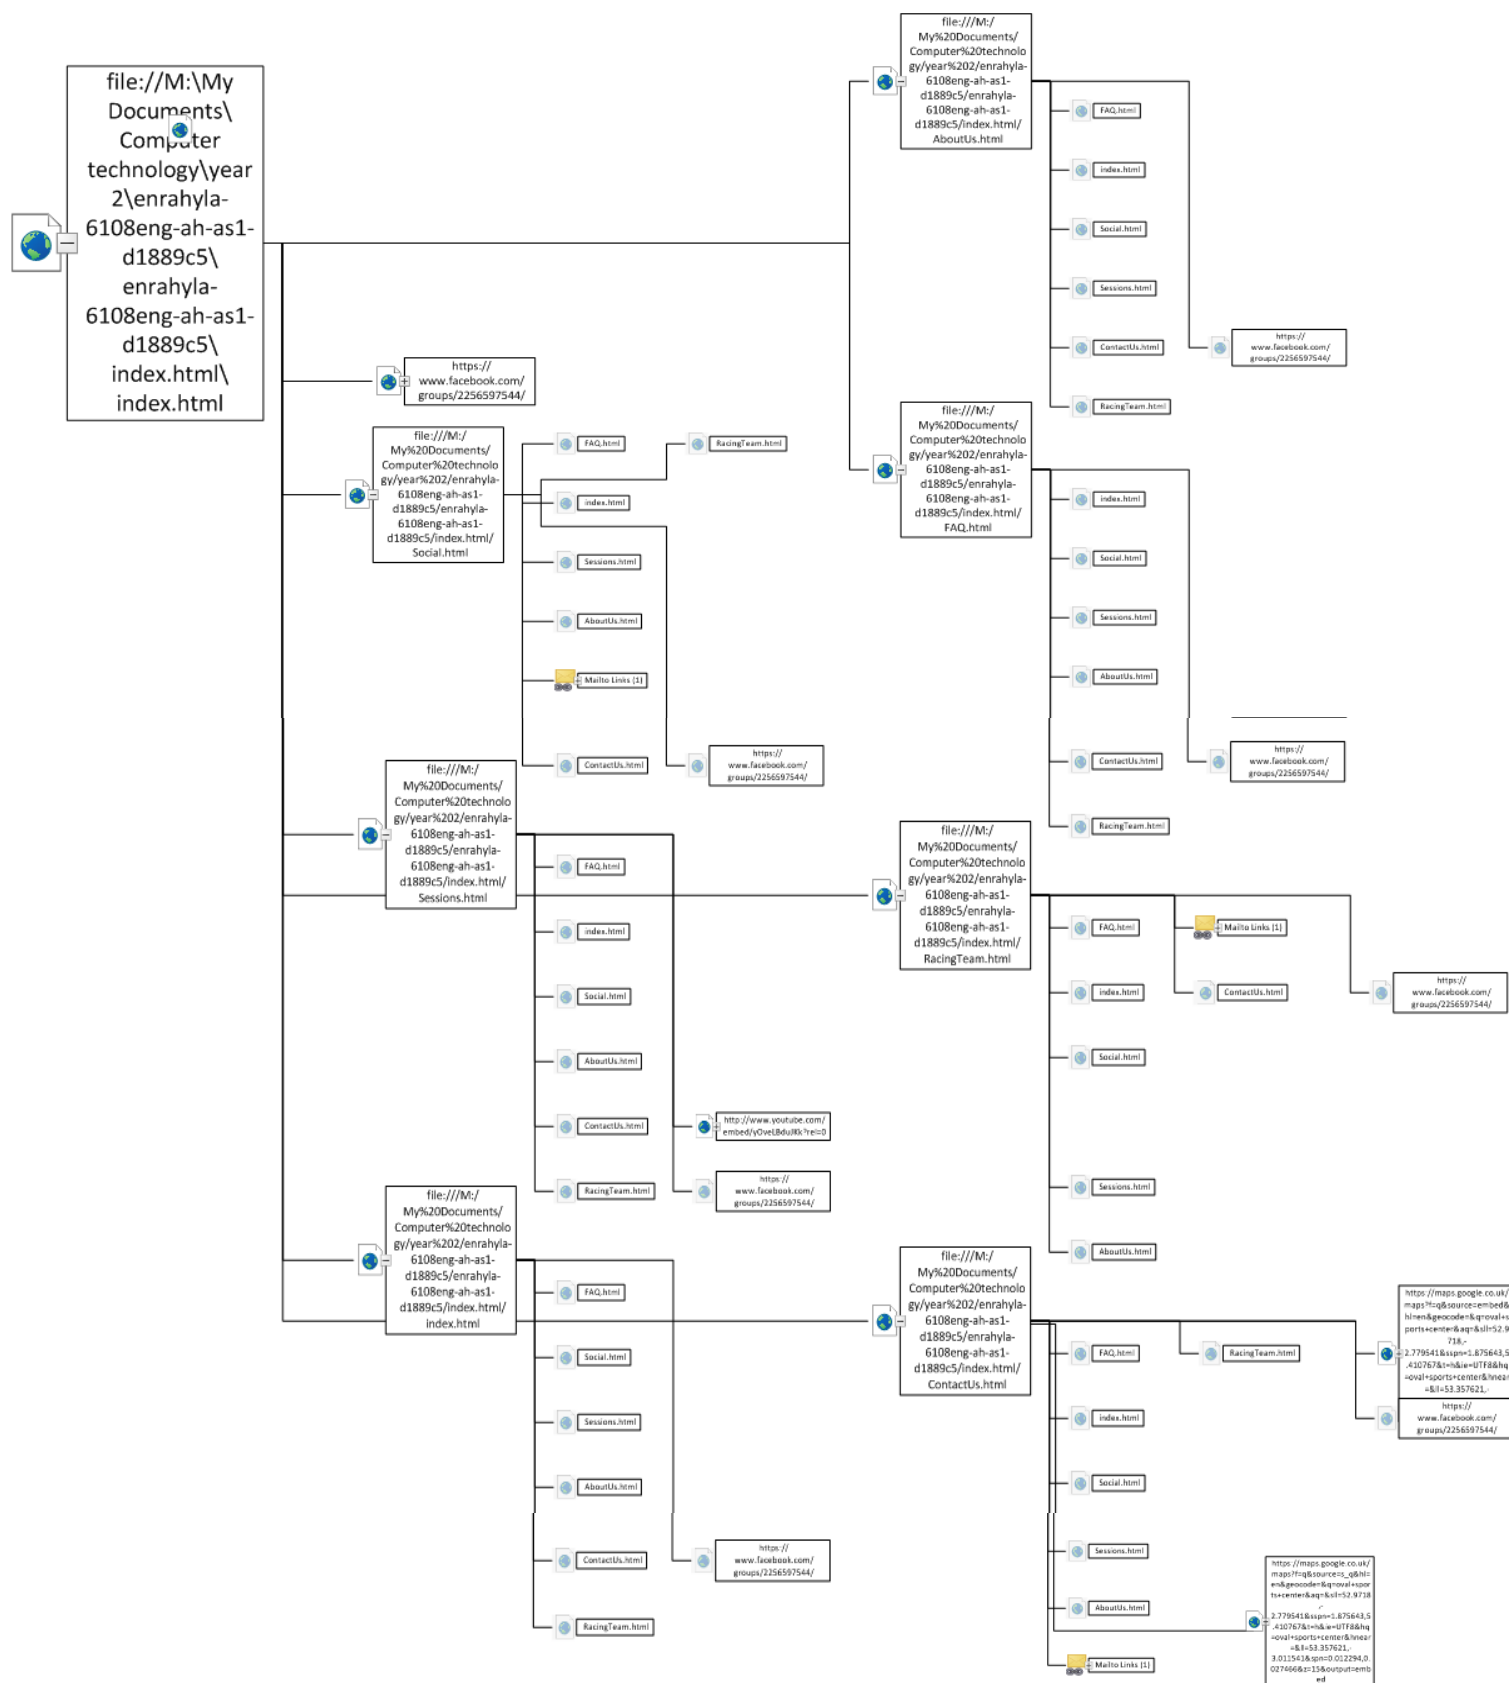

None Supported Features

This version of the website will not support the follow features:

- Database connection for users login
- Contact form upload connection on Contact Us page.
- Change of passwords
- Registration for users

These features are to be added at a later date.

Site Map

Screen by Screen Specification

When users visit www.ovalskiclub.com they will first be greeted by the home page. This will consist of snippets of information about the club and allow users simple navigation to the rest of the website via buttons and dropdown boxes. The website consist of 6 other pages, 7 including the home page allowing users to find out information about Oval Ski Club.

The website consists of a base CSS setting the websites background image, navbar colour, text colour etc… this is consistent throughout every page of the website ensuring that the website have a uniform layout. Each page will have a hero unit at the top of the page telling the user what page they are on. The only page exempt from this is the Social page will have a carousel of images as part of the hero unit. A break down of each page can be found below.
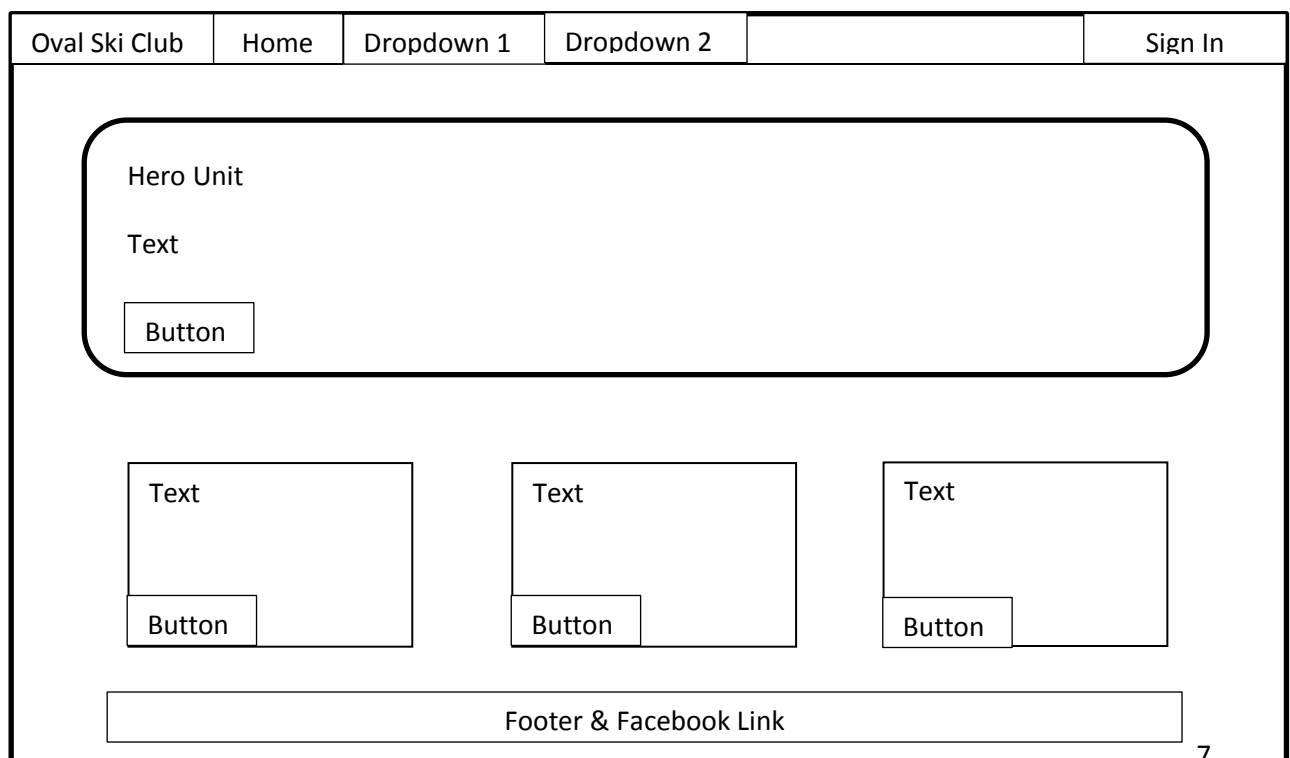

This website was created using the "Twitter Bootstrap" framework. This consists of HTML, jquery and Javascript. This can be found at http://twitter.github.com/bootstrap/ .

Home Page

The Home Page is the first page presented to the users upon visiting the website. The Home page will always have its own link in the navbar of every page. Each dropdown will consist of other pages of the website. The home page serves the purpose of:
